Character Statement**

## ARCHITECTURAL SURVEY – CONSERVATION AREA (Part) - INTRODUCTION

In order to demonstrate the character, diversity and age range of properties in the Conservation Area, a basic Architectural Survey has been undertaken. However, due to the size of the Conservation Area and time constraints, the survey has been restricted to the properties in Front Street and Grange Terrace. This covers the majority of the original 17<sup>th</sup> century village core and includes the greatest range and variety of buildings, and properties of architectural relevance, in the Conservation Area.

For ease of reference, the survey has been broken down into 2 parts: the north and south sides of Front Street.

For each building a brief summary of its form, height and scale is given, together with a description of the main materials used for its construction and also reference to relevant architectural features. Boundary treatments are also given, together with details of appropriate miscellaneous features, and critical comments. Reference is also made if the building has any form of official status, ie Listed Building, etc. **Section 12 of the Community Character Statement (Architectural Qualities) and Section 14: (Loss, Intrusion and Damage)**, include critiques on the relative merits of many of the buildings in the Conservation Area.

Under the heading Listed Building Etc, the following terms are used:

- **Listed Building** – recognised by Historic England for their architectural and/or historic importance – worthy of preservation.
- **On Local List** – although not recognised by Historic England, these buildings are similarly highly regarded at a local level, by South Tyneside Council.
- **Article 4 applies** – because of their architectural value, South Tyneside Council have removed the usual “Permitted Development (PD) rights” to certain dwellings. PD rights allow householders to carry out certain minor alterations and smaller extensions to their homes, without having to apply for Planning Permission from South Tyneside Council. As a result, planning permission must be obtained from the Council before carrying out **any** alterations or extensions, including replacement windows or doors.
- **TPO in place** – trees which are subject to Tree Preservation Orders, due to their local significance. Approval must be sought from South Tyneside Council before any trimming, lopping or removal of the tree can take place.  
NB: Although not having Tree Preservation Order status, South Tyneside Council must be given six weeks notice before any similar type of work takes place on any “tree” within the Conservation Area.
- **“Significant Walls”** - these are boundary, retaining and garden walls which are noted by South Tyneside Council for their historic and architectural value, and are worthy of conservation. The location of these are shown on the map, **Section 20** of the **Community Character Statement**.
